PROFESSIONAL SUMMARY

I am a Senior Full-Stack Developer with over 8 years of experience building high-performing, scalable web applications. Throughout my career, I have successfully delivered dozens of production web applications and e-commerce platforms for startups, SMEs, and global clients across India, Israel, USA and beyond, across multiple industries — handling everything from UI/UX design and backend API architecture to VPS, Cloud hosting and DNS configurations. I bring deep expertise across modern web and software ecosystems, headless frameworks, and e-commerce platforms.

Whether leading full-lifecycle projects independently or collaborating within cross-functional engineering teams, I focus on aligning technical strategy with core business objectives. To stay at the cutting edge, I actively integrate AI-driven development environments and AI coding agents into my daily workflow — allowing me to write clean code faster, streamline DevOps, and deliver high-quality solutions.

CORE TECHNICAL SKILLS

- Frontend & UI/UX:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3/Sass, Tailwind CSS, Figma (Design-to-Code, Wireframing, Prototyping), Redux/Zustand, Responsive Design, Web Performance Optimization.
